

Oracle: DÚHOVÉ PRZNENIE DETÍ

- CZ24 News | 6. května 2023

Otázka: Čo má osoba na obrázku spoločné s hnedými košelami?

Viac než by to bolo pre ňu príjemné.

A nie kvôli tomu, že Soros, ktorý ju prakticky celý život sponzoroval sa zbohatol na tom, že arizoval majetok maďarských židov. A ani nie kvôli tomu, že LGBTQ+ aktivisti, ktorí takmer zlynčovali Matelka (čo si o tomto jeho ťahu myslím si prenechám zatiaľ pre seba) sa správajú ako dúhová verzia hnedých košiel. A bohužiaľ toto prirovnanie je na mieste a to nielen kvôli tomu, že členovia SA a SS boli homosexuáli a pedofili, ako to odкрýva [tento článok](#), ale kvôli tomu, že LGBTQ+ hnutie przní deti cez propagáciu gay porna, ktorý sa tvári ako učebnica na sexuálnu výchovu:

Obrázok hodná tisíce slov.

Je to bohužiaľ relevantné nie preto, že Chelsea Clinton, ktorá [nepriamo priznala, že učebnica, ktorú propaguje je pornografická](#) a Soros sú z jedného politického košiara, ale kvôli tomu, že členovia SS a SA sa pokúsili aj drogami a hormónmi zacieliť to, aby [ich obeť sexuálne zneužívanie nevnímali ako sexuálne zneužívanie](#), ale ako niečo neutrálne či pozitívne:

At the end of Part II, we touched on a Danish Nazi doctor, Carl Vaernet, who specialized in hormone research that aimed to “cure” homosexuality:

Vaernet was a Copenhagen doctor who, realising the opportunities offered by the homophobic policies of the Third Reich, joined the Nazi party and enlisted in the SS to pursue his research to “cure” gay men.

This research was conducted on the personal authority of [Heinrich Himmler](#). The Gestapo chief demanded the “extermination of abnormal existence ... the homosexual must be entirely eliminated”.

[65](#)

From what we have uncovered thus far, it would be safe to say that the end-goal of Vaernet’s hormone therapy had nothing to do with curing homosexuals.

What we can assert is that most of the gays in concentration camps were likely victims of sexual abuse at the hands of Nazi luminaries. These victims were most likely traumatized, and sought the counsel of Magnus Hirschfeld.

The most likely reason behind Vaernet’s research was looking into ways to avoid the trauma associated with the sexual violence that Nazi leaders were doling out to their victims.

If a victim could not remember the crime and trauma experienced at the hands of Rohm, Hess, Heines, Schirach, or any other Pink Aryan, then how can it be reported as a crime?

Furthermore, if a victim did not see what happened to them as trauma, how could it be seen as a crime?

Finally, if a victim began to **enjoy** the violent experience, not only would they not see it as a crime, but would look forward to the next time.

Using a concoction of hormone and drug therapies, Vaernet looked for ways to psychologically alter a victim's perception of trauma. It would forge a way to psychologically legalize pedophilia. This would achieve the very thing that the early Prussian pederasts were after all along.

In the eyes of the Nazis, this would be seen as an act of permission. They could still groom and recruit youngsters for their perversions, but with the right hormone therapy, accompanied by a brainwashing cocktail of psychiatric drugs, their victims would not be traumatized, but instead would *enjoy* their place in the New Pink Aryan World Order:

For example, Nazi doctors had conducted extensive experiments with mescaline at the Dachau concentration camp, and the CIA was very interested in figuring out whether mescaline could be the key to mind control that was one of their big avenues of investigation. So they hired the Nazi doctors who had been involved in that project to advise them.

Another thing the Nazis provided was information about poison gases like sarin, which is still being used. Nazi doctors came to America to Fort Detrick in Maryland, which was the center of this project, to lecture to CIA officers to tell them how long it took for people to die from sarin.

Takže čo sa deje v USA resp. niektorých členských štátoch USA:

- Blokátory puberty pre deti v predpubertálnom veku.
- Hormonálne injekcie pre deti.
- Ritalin t.j. amfetamín (oblíbená droga nacistov) pre "hyperaktívne" deti.
- Pornografická literatúra, ktorá sa tvári, ako učebnica sexuálnej výchovy pre deti.
- Operácie na zmenu pohlavia pre osoby mladšie ako 18 rokov vrátane detí v predpubertálnom veku.
- Odobratie detí v štáte Washington a možné väzenie v štáte Virginia pre rodičov, ktorí sa nechcú prístupit na nezmysli, ktoré učitelia natlačili do hláv detí.

Toto je naplnenie sna sexuálnych deviantov z SS a SA t.j. neskorších členov a poradcov CIA pod rúškom sexuálnej výchovy a ochrany slobôd a práv LGBTQ+ komunity. Preto niet sa čo čudovať, že [OSN chce de facto dekriminalizovať aj pedofíliu](#).

Prosím vás toto je v praxi tá slušnosť, ktorú táto osoba a jej domovská strana PS-Progresívne Slovensko propaguje:
